 The image shows two views of a 3D printed object. On the left is a photograph of a physical, off-white, flared vase with horizontal ridges, sitting on a light surface. On the right is a digital rendering of the same object, showing its smooth, white surface and flared shape against a black background.	005
 A photograph of a physical, off-white, ribbed vase with vertical ridges, sitting on a white surface. In the background, a power outlet and some cables are visible.	006
 The image shows two views of a 3D printed object. On the left is a photograph of a physical, off-white, fluted bowl-like object with vertical ridges, sitting on a light surface. On the right is a digital rendering of the same object, showing its smooth, white surface and fluted shape against a black background.	007
 The image shows two views of a 3D printed object. On the left is a photograph of a physical, off-white, braided bowl-like object with a complex, woven texture, sitting on a light surface. On the right is a digital rendering of the same object, showing its smooth, white surface and braided shape against a black background.	008
